Safety Text: Vertically stored flooring pieces must be displayed in the approved turbo fixture or have bolted safety beam and toe beam. Laminate flooring or trim pieces must not extend into aisle or flue space behind fixture. All beams supporting palletized wood/laminate flooring must be at least 5 in height and bolted with grade 5 bolts. Pallets must also be supported by wire decking or wood stickers with two crossbars (front to back metal supports) under each pallet position. See MyApron for full Merchandise Safety Standards

Additional Information: Review the Sign Reference Guide for placement of non-SKU specific POP. If this bay does NOT have the updated THS fixture as POG ed here, merchandise the 3-6 take home samples that represent the larger display boards in the turbo rack fixture in the take home sample tray. The THS tray is located on the left hand side of the turbo rack fixture. It may be behind a c-channel that should be removed.
